# RECONSTRUCTED FUTURE/DESCENDANT GENEALOGY - Dilhan Eryurt

*Students and academic descendants (Future genealogy)*

Generated from frozen E2K v75 Module G / Master. Projection of Future_Genealogy, Direct_Students, Lineage_Paths and the accepted metrics; not a new source of truth.

Direct recorded students (G+1) include master's and doctoral supervision as separate categories and may include explicitly qualified scientific mentorship. Later generations follow recorded doctoral links. Numbering follows the frozen Module G output. An alternative advisor does not create a second person.

Thesis repositories: a missing search match or unexamined full text is not proof a thesis never existed. YÖK records are identified by Tez No when recorded. Origin-root uncertainty is not overridden by the downstream chain.

## Lineage profile

| | |
|---|---|
| **Recorded direct students/mentees (G+1)** | 8 |
| **Persons in recorded descent tree** | 16 |
| **Deepest generation** | G+3 |
| **V0 — Primary doctoral-only** | 14 doctoral descendants; 5 origin-level counted roots; h=1, g=1; G+1: 5; G+2: 3; G+3: 6 |
| **V1 — Record-confirmed doctoral-only** | 14 doctoral descendants; 5 origin-level counted roots; h=1, g=1; G+1: 5; G+2: 3; G+3: 6 |
| **V2 — First adviser only** | 14 doctoral descendants; 5 origin-level counted roots; h=1, g=1; G+1: 5; G+2: 3; G+3: 6 |
| **V3 — Inclusive/extended mentorship** | 14 doctoral descendants; 8 origin-level counted roots; h=1, g=2; G+1: 6; G+2: 7; G+3: 1 |

*V0/V1/V2 count accepted doctoral supervision paths at different evidence/adviser thresholds. V3 can include master's or contextual root pathways: its origin-level count must not be read as a count of formal doctoral students.*

## Open leads and source boundary

3 source-coverage/gap records reference this Origin. These may remain OPEN without blocking the release; they are not automatically converted to confirmed advisers.

Generated from the accepted E2K v75 Module G data; no additional student was inferred from the names of descendants. Historical ambiguity, missing dates, qualified G+1 pathways and archival coverage are explicitly retained.
