RECONSTRUCTED FUTURE/DESCENDANT GENEALOGY - Erdal İnönü

Students and academic descendants (Future genealogy)

Generated from frozen E2K v75 Module G / Master. Projection of Future_Genealogy, Direct_Students, Lineage_Paths and the accepted metrics; not a new source of truth.

Direct recorded students (G+1) include master's and doctoral supervision as separate categories and may include explicitly qualified scientific mentorship. Later generations follow recorded doctoral links. Numbering follows the frozen Module G output. An alternative advisor does not create a second person.

Thesis repositories: a missing search match or unexamined full text is not proof a thesis never existed. YÖK records are identified by Tez No when recorded. Origin-root uncertainty is not overridden by the downstream chain.

Lineage profile

Recorded direct students/mentees (G+1)	3
Persons in recorded descent tree	36
Deepest generation	G+5
V0 — Primary doctoral-only	15 doctoral descendants; 1 origin-level counted roots; h=1, g=1; G+1: 1; G+2: 2; G+3: 3; G+4: 8; G+5: 1
V1 — Record-confirmed doctoral-only	15 doctoral descendants; 1 origin-level counted roots; h=1, g=1; G+1: 1; G+2: 2; G+3: 3; G+4: 8; G+5: 1
V2 — First adviser only	14 doctoral descendants; 1 origin-level counted roots; h=1, g=1; G+1: 1; G+2: 2; G+3: 3; G+4: 7; G+5: 1
V3 — Inclusive/extended mentorship	34 doctoral descendants; 1 origin-level counted roots; h=2, g=3; G+1: 1; G+2: 9; G+3: 15; G+4: 8; G+5: 1

V0/V1/V2 count accepted doctoral supervision paths at different evidence/adviser thresholds. V3 can include master's or contextual root pathways: its origin-level count must not be read as a count of formal doctoral students.
