RECONSTRUCTED PAST GENEALOGY - Asım Orhan Barut

Doctoral supervisors and their academic ancestors (Past genealogy)

Generated from frozen E2K v75 Master / Module G; this is a registry-bounded projection, not a new source of truth. Registry wording and alternate advising links are retained.

Each recorded person is listed once per generation when a primary row is available. Additional supervision links are shown in the advisor-of field or as alternative-path records. A line ending in the registry does not prove that no other adviser existed.

Lineage profile

Registry record of the Origin	252608
Immediate supervisors (G-1)	1
Ancestors in the registry lineage	1
Advisor-link rows	1
Deepest generation	G-1
Lines that end	1

Immediate supervisors (G-1)

Ernst Baumann — immediate supervisor

DEGREE Dr.-Ing. Gottfried Wilhelm Leibniz Universität Hannover 1927

THESIS Der Wärmeübergang im Lokomotivkessel unter besonderer Berücksichtigung der Strahlung

ADVISOR OF Asım Orhan Barut

REGISTRY RECORD https://www.mathgenealogy.org/id.php?id=63074

Documentation and boundary

Data source: Module G Past_Genealogy with source and registry locators. Persons with multiple advisers remain a single person; source claims concerning contested formal advisers retain their uncertainty. The original PDF template supplied for Eryurt is used for typography and structure, not as authority for out-of-date metadata.
